

TERME DOBRNA

HOTELS, SPA & MEDICAL CENTRE
SINCE 1403

ENVIRONMENTAL POLICY 2019

Terme Dobrna's commitments to preserving our natural environment.

Terme Dobrna is the oldest active Slovenian natural thermal spa resort boasting more than 600-year-old tradition. The activity of the natural thermal spa resort is closely connected with the nature and its properties. The healing thermal water, pleasant climate and beautiful natural environment with cultural attractions represent the foundations of our spa resort. At the same time, we are aware that a resort such as ours places a burden on the environment despite our efforts to minimise the environmental impacts.

At Terme Dobrna, we are aware of this and we undertake to preserve the natural environment and do everything in our power to minimise the negative environmental impacts of our resort.

LEGISLATION

- We undertake to keep up-to-date with and consistently fulfil the requirements of the effective environmental legislation.
- We undertake to keep up-to-date with and cooperate in the preparation of environmental guidelines in all fields of our work (the spa tourism, wellness, hospitality...). We endeavour to introduce the adopted guidelines to our activities within the framework of our economic capacities.

SUPPLIERS

- We undertake to choose suppliers by giving advantage to those who have a steady and verified environmental practice.

LESS IS MORE

- We endeavour to make rational use of all raw and other materials, as well as energy sources and water.
- We undertake to gradually replace the existing raw and other materials and energy sources with eco-friendly ones.

OFFER

- We undertake to include eco-friendly products and services into our offer.
- We undertake to develop and upgrade our offer with eco-friendly services and products.

TERME DOBRNA

HOTELS, SPA & MEDICAL CENTRE
SINCE 1403

INITIATIVES

- We undertake to support environmental projects in our environment.
- We undertake to encourage our guests to actively engage in our eco-friendly activity.
- We undertake to encourage our guests, locals and everyone else to submit their ideas and suggestions to further improve our eco-friendly activities.

EMPLOYEES

- We undertake to further improve the culture and environmental awareness of our employees.

FUTURE

- We undertake to make every effort to use eco-friendly technologies in the context of economically acceptable solutions in every new investment in equipment.
- We undertake to include activities to permanently improve environment-related parameters into our development strategy and annual plan.

MONITORING

- We undertake to monitor our environmental impacts (waste production, water and energy consumption, noise...).
- We undertake to take immediate action in case any irregularities are found.

PUBLICITY

- We undertake to make a hard copy of our environmental policy available to the public.
- We undertake to annually inform our business partners at home and abroad about our environmental policy implementation.
